

TWO DARKENED SPORTS CANDIDATES FOR "GANG"

Pair Who Fared Forth on Robbing Expedition Run Afloat on the Law

Two dead game sports of Darktown went forth Saturday night with a pair of pocket stags guns and mopped up, expending office, and robbing houses, and robbing negroes right and left.

Now they are in the "cooler" under bonds of \$2,000 each with a perfectly good prospect of becoming dead-end convicts as soon as the law can take their wish.

Not wishing any hard luck, but I hope the higher court sends you up for forty years apiece," said Recorder Johnson Monday morning, when he heard them over.

Answering to the names of Harry Witherspoon and Frank Jackson, they stood before the recorder like the proverbial "kiss of fashion and moid of form."

Their overalls were the latest style, with elegant fur collars; their clothes were like the wonderful pictures in the magazine advertisements. Their shirts were draped gold watch chains; their hands were covered in gold jewelry; their shoes were patent leather with spats to match. In other words, they were regulars.

The recorder listened to the following account of their exploits:

They would find a house where the pickings seemed to be good, and would go into the house and into the room, and there they would find the goods. They would take the goods and go out the back door, and then they would go to the station and get a train. They would get on the train and go to the city. They would get off the train and go to the city. They would get off the train and go to the city.

But like all criminals, they finally reached themselves. They were caught by a hard-working negro who was going home with Saturday night groceries, and who had introduced him to the station. They were caught by a hard-working negro who was going home with Saturday night groceries, and who had introduced him to the station.

And when the word went forth that Witherspoon and Jackson had been captured, negroes flocked to the station from all over the city. They wanted to see the two men who had been so successful in their exploits. They wanted to see the two men who had been so successful in their exploits.

GARRISON URGES MORE MEN AND GUNS FOR WAR

Regulars and Militia Would
Just About Garrison Paris,
He Says

(By Associated Press.)
WASHINGTON, Jan. 4.—Representative Garrison, urging his proposal to investigate the nation's military preparedness, told the house military committee today that the "militia" army, militia, regulars and all of the United States would just about garrison Paris, and the United States today owns "it" more than half of the number of guns Russia had at the battle of Mukden.

Mr. Garrison had a series of lively sessions with members of the committee, which he arraigned for not summing up their views on preparedness. He quoted figures to show that the combined force of regulars and national guardsmen would form a battle line thirty-five miles long, the third of the way around Greater New York, and that, compared with European nations, the equipment of field guns of the United States army was negligible.

FAMOUS WAR SURGEON DIES IN WASHINGTON

WASHINGTON, Jan. 4.—Dr. Charles W. Chandler, who had charge of the medical forces in General Pickett's brigade in the Civil War, died here late last night, eighty-three years old. He was born in Spotsylvania county, in Virginia. After the war he became dean of the medical school at the Washington university and was consulted to have for several years.

FARM URGED FOR DOPE FIENDS AND DRUNKARDS

Recorder Thinks City Should
Work Men and Support
Families

(By Associated Press.)
Recommendations advocating the adoption of a system of caring for stockade prisoners who are unfit for hard manual labor, patterned after the most approved prison reform ideas in the United States, embracing a co-operative plan whereby the prisoners' families are paid for the prisoners' work, were made by Recorder Johnson Monday in his annual report to the mayor and city council.

Recorder Johnson, who succeeded Recorder Broyles in November, stated in his report that he has not had time to make a thorough investigation of the probation system in Atlanta, but finds there are a great many confined drunkards and dope fiends who are worthless at the stockade as far as labor is concerned.

To care for these, he recommends that the city purchase a tract of land eight or ten miles from Atlanta, that this be converted into a farm; that the street sweepings now destroyed at the crematory be utilized as fertilizer, and that here the white inmates and dope fiends cultivate food produce food stuffs for the stock for the various departments of the city, while those who are serving sentence, Recorder Johnson recommends that their families shall draw \$1 a week from the city for their support.

The report shows \$52,656.75 in fines was "worked out" by prisoners in 1914, as compared with \$16,062.25 in 1912, an increase of \$37,001.22; that 16,312 cases were docketed in 1914, as compared with 12,849 in 1912, an increase of 3,977; that the total of fines paid in 1914 was \$73,853.15, as compared with \$53,575.50, a decrease of \$20,277.65.

Recorder Johnson praises the work of City Attorney James L. Mayson, Assistant City Attorney William D. Ellis, Jr., W. H. Preston, clerk of the recorder's court; George Cornell, court reporter; Ed L. Arthur, court investigator; A. M. Dodd, prison guard; G. C. February, court stenographer; S. J. Gogler, adult probation officer.

MANY COAL OPERATORS TO QUIT OHIO FIELDS

Strike Has Ruined Business
and Forced Them Out,
They Declare

(By Associated Press.)
CLEVELAND, Ohio, Jan. 4.—The eastern Ohio coal operators consider it useless to make further efforts to negotiate a settlement of the strike begun in April; that many of the operators favor going on record as opposed to any future recognition of the United Mine Workers' organization, and that a number of companies plan to abandon the Ohio field, were statements made by operators here today for the meeting of their association.

"The coal business in Ohio has been ruined and many have abandoned or will abandon their Ohio mines and operate mines in other fields where conditions are more favorable," said Walter R. Woodford, president of the association.

"The Purvis-Maher company has abandoned its Ohio mines, has purchased property in West Virginia and plans to operate it at once," he said.

JAPANESE MAY WORK ON U. S. CONTRACTS

Secretary Garrison Will Not
Interfere With Employ-
ment in Hawaii

(By Associated Press.)
WASHINGTON, Jan. 4.—Secretary Garrison, it was announced today, has declined to interfere with the employment of Japanese labor on contract work of the war department at Schofield Barracks. He said that it is the policy of the department to do so in the absence of law to the contrary.

The secretary's decision was in response to a request from the San Francisco labor council that citizen labor be given preference on contracts made by the war department. The complaint being based on employment of Japanese labor by a subcontractor in the laying of a ditch at the barracks.

The contract contains no restriction against the employment of alien laborers. Hence, it is no law restricting or permitting such provision to be inserted in contracts of this character.

TWO NEGROES LYNCHED FOR FARMER'S MURDER

(By Associated Press.)
MONTGOMERY, Ala., Jan. 4.—Ed and Will Smith, negroes arrested, accused of implication in the assassination of R. A. Sullivan, an Illinois county farmer, last Thursday, were lynched early this morning by a mob of fifteen or more.

Stillwell was assassinated some time early Thursday morning while guarding his barn against negro thieves. He was shot in the back of the head. Hoodlums were put on the trail and the scene led directly to the cabins of the Smith negroes. They were accordingly arrested. Tradition on the Stillwell farm, it is said, fitted the tracks made by the negroes when arrested.

EASTMAN YOUNG MAN IS KILLED IN SHOOTING ROW

(Special Dispatch to The Journal.)
EASTMAN, Ga., Jan. 4.—Jim Roland is dead and his brother, John Henry Roland, is seriously wounded as the result of a shooting row here Saturday.

Some neighbors have a fling and the Roland brothers attended. They were said to be under the influence of drink and got into the most violent row they started to shooting. Oscar Sams, another young man attending the shooting, took a bullet on the porch and ordered the brothers away. Shots were exchanged and as a result one of the young men lost his life.

DIVIDENDS ARE DECLARED BY BANKS OF WASHINGTON

(Special Dispatch to The Journal.)
WASHINGTON, Ga., Dec. 4.—Three of the four banks of Washington are presenting their stockholders with dividends earned the last year of 1914. The National Bank of Wales is presenting its holders with a 5 per cent dividend, while the Citizens National bank and the Washington Exchange bank are each declaring the dividend 4 per cent dividend. Notwithstanding the stringency of money the banks report a good business for the past twelve months, and are looking forward to better times in 1915.

There could be no better new year resolution than
to build now.

The congress of European Nations is also impress-
ed by the Wilson message.

Weather is another element that doesn't seem to
figure as much as it used to in warfare.

Self-Sustaining Farms.

The federal Department of Agriculture has under-
taken a rural survey for the purpose of discovering
to what extent American farms, particularly those in
the South, are self-sustaining. Its preliminary re-
port, covering conditions in ten States, shows that in
the locality under observation in North Carolina the
farms yield eighty-two and three-tenths per cent of
the food consumed each year by the farm family.
This is the highest average thus far ascertained, that
in New York being only fifty and four-tenths, and the
average for the entire territory investigated being
sixty-four per cent.

The North Carolina record is especially interesting
as proof of the independence to which Southern
farms can attain. If a large number of farmers in
that State can produce at home more than eighty
per cent of their food supplies, certainly the farmers
of Georgia can do so. Georgia, indeed, has advan-
tages of soil and climate which are unequalled and
rarely equaled in the wide diversity of crops they
make possible. All food staples and nearly all vege-
tables and fruits can be raised in this State easily
and profitably. Yet, it is estimated that Georgia
spends more than twenty-four million dollars an-
nually in importing wheat, corn and oats from dis-
tant sections.

There are cheering omens, however, that this
unfortunate condition is soon to be remedied. For
several years past Georgia's production of foodstuffs
has steadily increased, and now it has received un-
usual impetus from the cotton situation. Farmers
realize that a large cotton crop in 1915 would be dis-
astrous, wherefore they are planting more corn,
wheat and vegetables and are giving more attention
to live stock. There could be no sounder basis for
the State's development and prosperity.

Score one broken resolution against the weather
man.

England has lifted the rubber embargo. Why not
stretch it, too?

It appears that young Englishmen will now have
to permit war to interfere with golf and football.

The pessimist will find some difficulty in explain-
ing why bank clearings are again about normal.

Successful Highway Work.

In discussing the highway improvements made in
this county during the last two years, the Bartow
Tribune observes that the road work has been carried
forward by business methods, on scientific lines, and
with a constant view to lasting results. A county
of which this may be said has good reason to be proud;
for, highways thus constructed are a tribute to the
community's character and a source of immeasurable
profit in all its affairs.

Road building must be conducted by business
methods, if the public funds, allotted to that purpose
are to be spent wisely and justly. There must be
painstaking inquiry into the cost and the kind of
material to be used, and into the peculiar needs of
the various districts where such work is to be done.
There must be adequate provision for inspection and
timely repairs. And the officials charged with these
duties must be as careful and vigilant as the officers
of a great corporation entrusted with the interests of
thousands of stockholders.

Furthermore, road building must be conducted on
scientific lines, if the taxpayers are to receive their
due. It is as foolish to try to build a good highway
with mere picks and shovels and so much undirected
labor as it would be to attempt the construction of a
railroad after that fashion. A competent engineer
and well designed plans are as essential to a high-
way system as they are to a railroad system; and
the county that fails to employ them can expect only
half-hearted results.

Business methods and scientific principles mean
durable work and true economy. Authorities esti-
mate that millions of dollars are wasted in American
road building because of a lack of due foresight and
care. It is gratifying to know that there are Georgia
counties which are willing to spend the money re-
quired for businesslike, scientific road building in
order that they may save the incomparably larger
amounts which unbusinesslike and unscientific road
building would entail.

The new year begins with the Balkans still on
the eve of going to war.

Now that the holidays are entirely over, the new
year resolution will be put to a test.

Latest advice is that Carranza is in some dan-
ger of having, to join the Mexican Ex-President's
Alumni Association.

The Economy of Building Now.

Figures compiled by a committee of competent
business men from the Atlanta Chamber of Com-
merce show that the cost of building and of other
property improvements and repairs is now from fifteen
to twenty per cent less than it was a year ago,
or is likely to be a few months hence. Whatever the
conditions that brought about this decided reduction,
those that will soon effect a proportionate increase
are manifest.

The business depression incident to the sudden
outbreak of the European war is lifting rapidly; in-
dustry and commerce have regained confidence and are
becoming normal again. Supply mills and factories
which were comparatively idle last September are
resuming steady operation, and in many instances
are crowded with orders. The recent decision of the
Interstate Commerce Commission, authorizing an in-
crease in freight rates, has enabled the railroads to
enter upon a new era of development and expansion.
The roads are preparing, or already have begun, a
vast deal of construction work and other improve-
ments, which create a demand for material and labor.

These and scores of kindred circumstances all
tend to enliven the building trades. Materials which
are now from fifteen to twenty per cent cheaper than
they were a year ago cannot remain so another
twelvemonth, if the revival of industry that is un-
derway continues. As a matter of self-interest there-
fore property owners, who contemplate building or
improvements, should take advantage of comparatively
low prices while they may. By so doing, they will
help themselves, and at the same time help the com-
munity, by giving needed employment to labor and
a new stimulus to trade.

A lucky chap is always out when trouble calls.

Unless a man has faith in himself, there isn't
much hope for him.

"Interesting" People.

Rising to a philosophic mood, the New York Her-
ald opines that the desire to meet what are termed
"interesting people" has become a mania with many
of those men and women "who hover about the
fringe of the real world of thought and deed, and
actually believe themselves a part of it." "In their
eyes, the engineer who drains a swamp or throws a
bridge across a river is not as interesting as the
author of a volume of unusual verse. Neither the
surgeon who performs a difficult operation nor the
organizer of a great commercial enterprise is entitled
rank among the interesting ones of the earth."

A very wholesome observation. Few words are so
elastic as "interesting," and few present such diverse
humors of application. One of the hardest of the
explorers, it is said, considered "uncomfortable" that
gentle of village cosmopolites, the most interesting
he knew; and it is frequently seen that the mildest
sort of men delight most in stories of pirate
caves and adventurous seas. The fact is that every-
thing and everybody is interesting to eyes that really
see and hearts that really feel. "There is no unim-
portant spot on earth, the beauty of the stars is over-
all," wrote a Southern poet. "Nor is there an unim-
portant person in the world; the wonder of human
nature is in them all. A man does not have to write
books or explore jungles or wear purple trousers to
be interesting."

Give and forgive is a good codicil to attach to
the Golden Rule.

Unless a man is willing to admit his ignorance,
he will never be in a position to learn.

Occasionally a man loses his job because he
doesn't know enough—or else because he knows too
much.

Growth of Savings Deposits.

It is interesting evidence of American thrift that
more than eleven million persons are depositors in
the savings banks of this country, their deposits ag-
gregating four billion, nine hundred and thirty-six
and a half million dollars, an average of nearly
four hundred and fifty dollars each. These figures
from the report of the Comptroller of the Currency
represent an increase of three hundred and fifty thou-
sand in the number of depositors and a gain of two
hundred and ten million dollars in the amount of
their savings for 1914, as compared with the pre-
ceding twelvemonth. For a year of business anxiety
and retrenchment, that is a remarkable record.

Savings deposits reflect the energy, the foresight
and prudence, and in an important sense, the char-
acter of the rank and file. They accumulate, dollar
by dollar, from modest earnings, and are a fair
index to economic and social conditions. The in-
crease on these deposits was not so great in 1914
as in the year before—a fact easily accounted for by
the depressing effect of the war. The significant
thing, however, is that they did not decrease, but
on the contrary, showed a gain of two hundred
and ten million dollars. In the New Year that has
begun so auspiciously, there should be far larger in-
creases both in the number of depositors and the
amount of their savings.

A onesided quarrel is soon ended.

Every time a pessimist laughs we wonder who the
joke is on.

A misdirected search for happiness is the step-
mother of selfishness.

The happy wife is not a woman who has married
the best man on earth, but one who is philosophical
enough to make the best of what she got.

Shakespeare Says--

"If I be not ashamed of my soldiers, I am
a mouse under a gun." I have misused the king's press
drammatically. I have got in exchange of a hundred
and fifty soldiers, three hundred and odd pounds.
I need me none that good householders, old
men's sons; inquire me out contracted bachelors,
such as had been asked twice on the banns;
such a commodity of warm slaves as had loved
hear the devil as a drum; such as fear the
report of a caliver worse than a stretch fork
or a wild duck. I grieved me none but such
poets-and-butlers, with hearts no bigger than
pinks' heads, and they have bought me out their
services; and now my whole charge consists of
ancients, corporals, lieutenants, gentlemen of
company, slaves as ragged as Lazarus in the
sanctified cloth, where the gutters' dogs licked his
sores; and such an, indeed, were never soldiers,
but discarded serving men, younger sons to
younger brothers revolted tapsters and ostlers
trade-fallen—the cankers of a calm world and a
long peace. And such have I to fill up the rooms
of that that have bought out their services,
that you would think I had a hundred and fifty
tattered prodigals lately come from awine-kepping,
from eating durt and hucks. There's but a
shirt and a half in all my company; and the
half shirt is two napkins tacked together, and
the shirt, to say, is a rag. I would I might
have said at Salist Alban's, or the red rose
keeper of Daveny—Falstaff in Henry the
Fourth.

The Building of the Sphere

BY DR. FRANK CRANE.
(Copyright, 1911, by Frank Crane.)

To construct the mystical spirit sphere you must
have four dimensions.

1. The first is the line, having but one dimension,
length. That is right thinking. Unless there be truth,
acknowledged and clung to by the mind, there can be
no strong character. You must not believe a thing be-
cause it is expedient, or because it is common, or
because others believe it; you must believe it for one
reason only—because you are convinced that it is true.
Unless you believe in truth, you can have no assur-
ance of health, either of body or of soul.

2. The next figure is the plane, having two dimen-
sions, length and breadth. The spiritual analogy of
this is right thought plus right feeling. What was a
cold mental conception now becomes warm; it has
received the touch of life. "Go ye in to live," said
Christ, based on right understanding of truth, means
that to have knowledge you have added vision, the per-
ception of those values yet profoundly secreted truth
which can only be grasped by an intellect freed by emotion.

3. The third figure is the cube, which has three
dimensions, length, breadth, and thickness. The cube
function of the spirit is action. Right thought, right
feeling, right action, but these are never efficient until
they are expressed in right action. To a man act-
ing on his intellectual feeling he has become a four-square,
solid being. Never till then has he real worth. Right
action brings emotion and intellect into use. If a man
solidly holds what he feels and knows to be right it
clarifies his intellect and lifts him out of dangerous heresies,
and also strengthens and disciplines his emotions.

4. Above these three figures, more complex and per-
fect than they, is the supreme shape of all—the sphere.
It is mysticism. It is the sphere of the mind, the
sphere of the heart, the sphere of the body, the sphere
of the soul. It is the sphere of the divine, the sphere
of the human, the sphere of the material, the sphere
of the spiritual. It is the sphere of the universe, the
sphere of the cosmos, the sphere of the world, the sphere
of the life, the sphere of the death, the sphere of the
resurrection, the sphere of the glory, the sphere of the
honor, the sphere of the power, the sphere of the
wisdom, the sphere of the love, the sphere of the
joy, the sphere of the peace, the sphere of the
bliss, the sphere of the eternal life.

Excellent as faith is, it is of no value unless it be
the apex of right conduct, feeling and intelligence. But
coming as the normal completion of the spiritual
makeup of the human soul a sphere, perfect, solid, yet
with the mystic quality of divinity.

The Searchlight

COKE-MOBILES.

One way of solving the problem of the constantly
mounting cost of gas for the propulsion of the motor
driving of motor vehicles is to find a substitute for it.
And this does not necessarily involve the discovery
of another volatile liquid, as has been demonstrated.
In London they are about to tackle the problem by
the construction of several coke-burning motor com-
pounds, applying the principle of the gas engine and
driving of motor vehicles is to find a substitute for it.
And this does not necessarily involve the discovery
of another volatile liquid, as has been demonstrated.

In combustion, coke gives off practically no smoke
or fumes. The plan is to burn it in huge hoods with
the air exhausted into the atmosphere. The coke is
new fuel to the combustion box while automatically
removing the ash. Steam will be generated in steam-
erated tubes radiating from the combustion box, and
be applied to a steam motor. Many of these huge
coke already use steam motors but generate their heat
from the combustion of kerosene. They can be oper-
ated with coke, it is claimed, for one-third the present
cost of kerosene.

The device in compact little instrument of steel op-
erated by a hand crank. Tape of the desired width
and texture is fed through rollers which ink it. It then
passes through other rollers which press it into a
solid form, and the finished product is then wound
and remove surplus liquid. It is finally wound on a
standard spool of any make of machine and is there-
fore ready for immediate use. A few turns of the
crank will produce a full roll of ribbon.

The machine is inexpensive and the tape and ink
can be purchased at reasonable prices. Although the
savings is so great that the appliance promises to come
into quite general use.

A TRIOTLET.

I resolved very well
On happy New Year's day
To make some progress
In my resolutions now
They have all fled away
I cannot find a single one
That I did not come at day
I'll not see 'n' half of them
Until next New Year's day.

AMERICAN MOUND-BUILDERS

BY FREDERICK J. HASKIN.

Like most of the other antiquities in this country,
the mounds of the Great Lakes region and of the Mis-
sissippi Basin have been made the subject of a great
deal of romance masquerading as science. Early writ-
ers were almost unanimous in attributing these mounds
to some vanished people, which was much more numer-
ous and civilized than the tribes of Indians who occu-
pied the country at the time of the discovery of the
country, which gained a great deal of support was the theory
of a civilized tribe of Mexico, had at one time occupied what
is now the United States. Others believed the mounds
to have been the work of the Indians, who lived in the
southwest. But the favorite theory has always been
that the mounds were the work of some great nation,
which, in remote antiquity, dominated the country from
the lakes to the gulf and the Mississippi to the
foothills of the Alleghenies, and which was subsequently
annihilated, leaving only these forest-grown monu-
ments.

By a laborious study of the mounds themselves, the
bureau of ethnology has discovered this and all of
the other theories of the archeological romancers, and
has established the fact that the mounds were the
work of the North American Indians, the ancestors of
the natives occupying the same territory when America
was discovered by Europeans.

Although the myth of a vanished race is thus de-
stroyed, the mounds still remain very interesting an-
tiquities, for they are undeniably relics of a day when
the Indians were much more numerous and led a more
settled existence than was the case when Europeans
reached this continent.

The belief that the mounds were the work of a peo-
ple of the same race as the North American Indians was
based chiefly upon the fact that some of these ap-
pear to be the remains of walled and fortified towns,
while the Indians have been found ever since the
white man has known them.

This argument is largely answered by a study of
the diaries and memoirs of the earliest explorers, who
came to America in the sixteenth and seventeenth cen-
turies, for they are undeniably relics of a day when
the Indians were much more numerous and led a more
settled existence than was the case when Europeans
reached this continent.

Dr. Soto's journal shows that he lived almost entirely
upon the products of native agriculture during his ex-
plorations, and he describes some of their plantations
based on the same principles as those of the Indians
of the Mississippi and its principal affluents, where
are found many of the largest mounds, the people would
have been able to reach the mounds, and this necessity
to explain the existence of some of the highest
mounds.

Early investigators believed that many of the mounds
were built for religious purposes, and from the fact
that both charred clay and human bones were found in
many of them, they drew the conclusion that the
mounds had been used as altars, where human sacrifices
were made. However, as shown by the scientific in-
vestigation, however, has shown that human sacrifices
were never practiced by the authors of these mounds,
and that the mounds were built for other purposes,
which they supported afterward buried.

The last bit of evidence that the North American
Indians were the mound-builders was discovered quite
recently by an expert of the bureau of ethnology. He
found that the mounds of the Mississippi and its prin-
cipal affluents, where are found many of the largest
mounds, had been built by the Indians, who lived in the
southwest, and that the mounds were built for other
purposes, which they supported afterward buried.

The mounds have been the cause of all this
controversy are a number of earthworks, of various
shapes and sizes, which are found in the Great Lakes
region, in the valleys of the Mississippi and its prin-
cipal tributaries, and in the Gulf States. That do not
occur in the west.

TRAVELETTE---121--- MONTEREY

BY NISKAH.

Monterey, metropolis of northern Mexico and little
more than a mile from the city of Mexico, is a place
of great interest to the traveler. It is a city of
States border, shows at once its Indian, Spanish and
American affiliations. On its outskirts are to be seen
the little adobe huts and less frequently the straw
and wooden shacks of the "Indios" or peons, set along
dusty roads. Farther in are the substantial masonry
houses of the "gringos" or Mexicans, whose houses
are built with their barred windows. Surprisingly
enough, the streets they frown upon are not unusually
narrow.

Evidences of Latin culture come to light in the cen-
ter of the city. The buildings that surround the great
square show the influence of the Spanish style, and
the statues that stand before them are conceived
and executed in excellent taste. Farther west is a
park, the Plaza de Armas, where the city is built
on the days when are given there the band con-
certs which form such a feature of Mexican city life.

It is in the engineering features of the city that
American influences are most readily seen, though they
enter very largely into the commercial activities. The
railway station, constructed under the supervision of
American engineers and architects, would do credit to
a city of similar size in the United States. Monterey

Supplementing the Gas Range

The fireless cooker and the gas range have re-
cently been combined by an inventor, the accomplish-
ment being a device for lighting the burden of
the "fireless" kitchen. The combination of the fireless
cooker and the fireless range had previously been
effected, but there are, of course, many households
who, for one reason or another, cannot make use of
electricity in cooking, but for whom gas is available
and in daily use.

The new device is in appearance little different
from an ordinary gas range, and so far as the sur-
face burners are concerned, is no different. The fire-
less cooker principle is embodied in the construction of
the oven. This has thick asbestos-insulated walls and
is heated by gas flames above and below. So long
as the burners are lighted, the heat is retained in the
products of combustion. With the turning off of the
burners, however, the ventilators automatically close,
and the heating compartment is transformed into a fire-
less cooker, holding its heat for hours and allowing
the cooking process, started on top of the range
in the oven, which burns lighted, to be carried to
completion.

Like the electric fireless cooker, the new device
does away with the necessity for heating stoves, or
iron and packing them into cooler compartments, and
should prove a great boon to the housewife whose
aim is efficiency.

Quips and Quiddities

One day a group of San Francisco stevedores were
lunching in a sheltered nook on a wharf. One of them
went across the street for a plug of tobacco, and dur-
ing his absence another substituted for him a tin of
coffee and milk, his own tin of milk being left in the
box.

When the first stevedore returned to his lunch he
could hardly believe his eyes.

"Well," said he, "I have heard of clever thieves,
but to steal the milk out of a guy's coffee is sure go-
ing some."—Everybody's.

A member of the bar tells of a case where the
charge was the theft of a watch, the evidence having
been most conflicting. As the jury retired the judge
observed to the clerk: "I am glad to hear that you
have any differences that might present themselves
to the middle of the jury."

The one who remained over an expression of extreme
perplexity. Observing his hesitation the judge said, "Is
there anything more you would like to ask me?"
"Yes, your honor," said the juror eagerly, "I'd be
glad if you'd tell me whether the prisoner really stole
the watch."

"Now, Thomas," said the judge, "can you explain
what you mean by the prisoner stealing the watch for
war?"
"It means," replied Thomas, "that the prisoner stole
the quarrel and then let the young men do the fight-
ing—"

WISHES FRIEND LUCK, BUT NOT AT COST TO GERMANY

Whitman Says He Didn't Wish Friend Success on the Battlefield

A headline in Sunday's Journal has been causing a stir. A German of Atlanta, some trouble. The headline reads, "German wishes 'Enemy' success on battlefield," and the story told how Mr. Whitman, a friend of the German, wished him good luck as a friend. "I hope Mr. Clarke, an Englishman, good-bye to the Union flag," said Mr. Whitman, and Clarke left Atlanta to fight for the allies.

Whitman went on to explain that he did not wish Mr. Clarke success on the battlefield, that he merely wished him good luck as a friend. "I hope Mr. Clarke doesn't get shot," said Mr. Whitman, and he said a thing to him that might be construed as traitorous to Germany.

RESINOUS PRODUCTS USED

FOR EXPLOSIVES, CHARGE

Bryan Gives No Assurance Great Britain Will Rescind Contraband Order

Great Britain justifies her action in placing resins on the list of contraband of war, according to the absolute contraband list on the alleged ground that these products are used in the manufacture of an explosive which is impervious to dampness, such explosives being peculiarly valuable and necessary to the enemy during a winter campaign when rains and snows are frequent.

Information of the basis of Great Britain's action is contained in a telegram received by Governor Sloan Monday from Secretary of State Bryan. Secretary Bryan's telegram is in reply to a message of protest sent him several days ago by the governor in which it was pointed out that unless Great Britain's ruling was modified, heavy loss would accrue to the turpentine and naval stores industries in Georgia and other states.

Secretary Bryan's telegram, which brings no satisfactory assurance, follows: "Washington, D. C., Jan. 2, 1915. 'Governor John M. Sloan, 'Atlanta, Ga. 'Matter of placing resins on products."

Cloudy weather prevails all over the United States Monday, according to the local weather bureau. The outlook for Atlanta and vicinity Monday and Tuesday with a slight rise in temperature, which may follow dry rains.

The temperature Monday morning was 28 degrees. This will rise during the day to about 30 degrees. Tuesday morning will be about as chilly as Monday morning.

The same applies to General Leif's. For this reason we German-Americans protest against the one-sided policy of continually pulling Bernhardt into the line of light to speak for Germany and ignoring General Leif.

For a danger-signal for the nations for whom they were written, to show them that there was not only a possibility of war, but a probability; that in modern times long preparation is necessary to meet the shock when it comes. Had they reflected the sentiment of a large majority of the people of Germany and England, they would have been no occasion to print either one.

It is understood unofficially that the ground advanced for this action by Great Britain is that resins and turpentine are used in the manufacture of an explosive which is impervious to dampness. The language in the band list as received by the department from London is quite resins and turpentine, camphor and tincture of spirits. The department will make inquiry of the British government whether terms used include resin proper.

CAREY DENIES LOVEFEAST

IN PARK BOARD MEETING

Says He Only Appeared Before Board in His Line of Duty

Dan Carey, who was ousted from the position of general manager of city parks last Friday, declares that published articles about the meeting of the park commission on Saturday, calling it a "love feast," have misrepresented his attitude.

"I was simply before the board," said Mr. Carey, "in order to explain the 1915 park budget, which I had prepared, and with which the members of the commission were not familiar."

"I went there simply in a line of duty, just as I went to the park office in the morning to write the minutes of the board meeting at which I was defeated."

"It is true that the board adopted the budget I had prepared and after this Commissioner C. J. Brannan moved that the park board give me a vote of confidence, the board said that I didn't want it to give me any such vote, and at my request Mr. Brannan withdrew his motion."

"The only possible basis for a 'love feast' story might have been in the fact that after I had requested Mr.

COMMITTEE NAMED TO STUDY UNEMPLOYMENT

Chamber of Commerce Seeks Improvement of Conditions in Atlanta

Mail P. Wilkinson, president of the Atlanta chamber of commerce, has appointed an able committee, headed by Cator Woolford, to study unemployment in Atlanta and see if any practical measures can be found which will permanently improve conditions.

This committee is not to do the work of an employment bureau, nor is it a relief committee, but its intention is to diagnose the situation and see what is economically possible in the way of permanent improvement.

Following is a list of the members of the committee: Cator Woolford, chairman; R. S. Wagsell, H. G. Hastings, W. H. Brittain, Clyde L. King, J. M. R. Hoxsey, Brooks Moran, P. E. Kamper, S. C. Dinkins, Rockwell Johnson.

Brannan to withdraw his motion, Ben Leif Cree proposed that the board vote me its thanks for my work of six years for the park system. As this came from one of my friends, I couldn't ask that it be withdrawn.

"I do not want the people to think that I countenance in any way the plot against me, or rather the plot against the people as well as myself, which resulted in my defeat."

HURT WILL CUT PAY ROLL

THREE THOUSAND YEARLY

New Chief of Construction Will Abolish Three Department Jobs

Nym Hurt, who on Tuesday succeeds Captain R. M. Clayton as chief of construction, has "beat Mayor Woodford" in the matter of a reduction in the payroll of the construction department.

For several weeks the mayor has been insisting that there should be a reduction of the salary list of the men employed in the construction office so that those salaries shall be equalized on a downward scale.

Mr. Hurt let it be known Monday that when he assumes office Tuesday three jobs in his department will be abolished and a change will be made in the salary of one of the jobs to be abolished, saving a monthly salary of \$150 and other jobs \$10 a month each. With this lopping off the payroll of the department will be reduced \$250 a month or \$3,000 a year.

Mr. Hurt also announces that Karl Brittain will be appointed assistant chief of construction; that A. P. McCalland will be appointed engineer in charge of streets and Michael Lawrence engineer in charge of sewers.

EVENT IN CLUB CIRCLES

An announcement of wide interest to Tennessee women is that Mrs. Percy W. Penningback, of Anderson, Ala., president of the General Federation of Women's clubs, has accepted the invitation of Mrs. George W. Denney to attend the annual convention of the Tennessee Federation to be held in Morristown next spring.

The dates have just been selected for this convention, May 3 and 7, inclusive, and the presence of the first lady of American clubdom at this convention, plans already being formulated in the hospitable convention city, assure a brilliant and memorable occasion in the club history of Tennessee.

Mrs. Penningback has splendid oratorical ability, and this will be her first visit to the state convention, though she was an honor guest a year ago at a convention held in Knoxville under the auspices of the plans of the Tennessee Federation, and there are a potent influence in many public welfare movements.

The General Federation of Women's clubs is one of the most influential organizations in America, and will be most inspiring to the Tennessee club women to have Mrs. Penningback attend the deliberations of the association. There are now 5,000 club women enrolled in the ranks of the Tennessee Federation, and they are a potent influence in many public welfare movements.

These are not a clearance of leftovers or unsalable fugitives, from stock taking, but, every one is absolutely a new one; fresh from its box, this morning.

The materials are Boucles, mixtures, Cheviots, Chinchillas, Serges, double faced materials and popular Camel's hair.

The colorings and mixtures are up-to-date, the styles are the very latest mid-winter models, and you can buy one of these, resting assured, they are the very latest thing.

New belted coats; half fitted backs; flaring skirts; military collars are among the prevailing models.

Be assured, that you are not invited to a sale of left-overs or discards; but, to a sale of new coats, which in the regular way would cost you--

\$10, \$12.50, \$15.

Tomorrow's sale price \$5 for choice.

LITTLE STORIES FOR BEDTIME

By Thomas W. Buegan

No longer were the Green Meadows green, now white. Sometimes, especially when his stomach was full, Peter Rabbit thought that they were almost as beautiful when they were covered with snow as when they were green. Peter likes the snow. Yes, sir, Peter likes the snow. He likes to see it glisten and sparkle in the sun, and he dearly loves to make tracks in it. It always tickles Peter when he finds that his tracks have fooled some one. You know when Peter is in a hurry he puts his long hind feet down in front of his forefeet, and so his tracks look for all the world as if he had been going in just the opposite direction. People who don't know this often are fooled, and this Peter thinks is one of the best jokes ever.

Peter long ago found out that the snow tells him a lot of things that he would never know if he had been going without leaving tracks behind him, and so it is quite easy to learn a lot about his neighbors and what they have been doing just by following their tracks. Peter was very fond of his new tracks. Peter hopped about the way and the way all through the forest and he learned many things. He followed the tracks of Freddy Fox. He learned where Mr. Grouse had made a new hiding place. He laughed when he found the tracks of the Billy Possum. They didn't go ten feet back from his old hole before they turned back. He didn't like the snow and had gone back to try to sleep until it was gone.

Peter went away into the Green Forest, and when he got away in there he remembered something. It came into his mind so suddenly that it made him jump right up in the air. He remembered that it was toward the end of the last winter that he had seen Buster Bear's great tracks for the first time, and had wondered and wondered who could have made them. And this reminded him that he didn't see Buster's tracks anywhere now. That was funny. He hadn't heard that Buster had left the Green Forest, and he was quite sure that he would have heard of it if Buster had. Still it was queer, very queer, that he hadn't found Buster's tracks anywhere.

Of course, Buster couldn't possibly walk around without leaving tracks. Even his tiny little tracks, wherever he went. Peter sat down and scratched his left ear with his long right hind foot. He scratched his right ear with his long left hind foot. If he could he probably would have scratched both ears with both hind feet at the same time, because he was so puzzled and was trying so hard to think what could be the reason that Buster Bear had made no tracks.

"I'll just look a little farther," thought Peter. "There must be some sign of Buster Bear. Such a big fellow as Buster must have to eat, and how can he get anything to eat if he doesn't walk around?"

As Peter couldn't answer his own question, he started around to all of Buster's favorite places. He looked and he looked, but not a single one of Buster's big tracks did he see. He asked every one he met if they had seen Buster or his tracks. No one had. Peter grew more and more puzzled. He went over to the pond of the Green Forest, and he looked at it. He got there he found that the pond was covered with ice, and he knew that Paddy was in his house with the

Caldwell-O'Farrell

A pretty home wedding of Saturday evening was that of Miss Catherine Mae O'Farrell and Mr. Robert Deaver Caldwell, of Atlanta, at the home of the bride's parents, Mr. and Mrs. John N. O'Farrell, in Inman Park, Rev. S. W. Reid, of the Associated Reform Presbyterian church, performing the ceremony under a circle of white wedding bells and smiles. The bride wore a gown of white with pink and blue ribbons and white roses were used effectively in decorating the altar, and the bride's train was carried out in the rear. The ceremony was served during the evening by Miss Ruby England, Ella Sevellevy and Emma Glascock.

At 8:30 o'clock an aisle of white satin ribbons and pink tulle was made by the little brothers and sisters of the bride (dear, Richard, Jean and Elizabeth O'Farrell and Mary and Shelly Ivey). The little girls were dressed in white and wore pink ribbons. As Miss Lucile O'Farrell, sister of the bride preceded the bride to the altar, Mr. Caldwell, attended by Mr. Ernest Bell as best man, the bride and groom were joined in matrimony was performed, after which the bride and groom received the congratulations of their friends. During the ceremony Miss McNair played the baritone. The bride's gown was of white chiffon over satin, trimmed in pearls and chamois lace. She wore a Dutch cap of lace and pearls and carried bride's roses. The maid of honor wore blue with a veil of gold and white chiffon and princess lace, and carried an arm bouquet of pink carnations.

Mr. O'Farrell was assisted in receiving the guests by Mrs. Charles Bell, Robinson and Mrs. Martha Kirkpatrick. Among the out-of-town guests were Dr. and Mrs. J. M. Caldwell, of Atlanta; Mr. O'Farrell, Kate and Lulu Cody and Mr. and Mrs. Thomas C. O'Farrell, all of South Carolina.

—Mr. Thomas C. O'Farrell, a brother of the bride, was also receiving the congratulations of his friends and relatives, having been married on December 23, Spartanburg, to Miss Annie Laurie Welch. Mrs. O'Farrell wore blue satin and lace, and a corsage of red Richmond roses.

Mr. and Mrs. Caldwell are at home at No. 2 Elizabeth street, Inman Park.

Stewart-Long

Mrs. C. E. Long announces the marriage of her daughter, Elizabeth Stewart, to Mr. Clifford Foster Stewart, on Thursday evening, December 31, Rev. W. H. Major, of the Capitol Avenue Baptist church, officiated. Mr. and Mrs. Stewart will make their home with the bride's mother at 23 Roydon avenue.

thick walls out in the pond, where no one could get at him. All night long Peter scamped around in the moonlight looking for some sign of Buster Bear. All through the Green Forest he left his own tracks, but not a single track of Buster Bear did he find. He was a very tired Rabbit, was Peter, when at last he started for the old Red Patch. His head was quite as tired as his legs, for all the time he had been running around he had been thinking and thinking, and it hadn't been a bit of use. "Buster Bear isn't here, that's all there is to it," said he. Yet somehow he was sure that he was wrong. He was sure that he was mistaken, and that Buster Bear was there after all, and Buster Bear was.

SOME INTERESTING WEDDINGS

Abernathy-Quillian

One of the prettiest of the holiday weddings was that of Miss Ruth Quillian and Mr. Ernest L. Abernathy, of Chicago, Ill., which took place at the home of the bride's parents, 67 West street, on December 24. The home was attractively decorated in palms and growing plants. The wedding march was played by Miss Lottie Wilson and the bride entered the altar with the groom. They were met at the improvised altar by Rev. H. M. Quillian, who performed the impressive ring ceremony immediately after the wedding. Mr. and Mrs. Abernathy left for their home in Chicago.

Cunningham-Ellard

GREENSBORO—Mr. Ed Ellard, of Greensboro, announces the marriage of his daughter, Birdie, to Mr. Paul Cunningham on Wednesday, December 23, at Millersville. The bride made Greensboro her home until several years ago when she entered the Georgia Normal and Industrial college at Millersville, and after her graduation became librarian at the college. The groom is a civil engineer and connected with several projects in north Georgia. Mr. and Mrs. Cunningham will be at home at Tallulah Lodge, Ga.

Thompson-Perdue

The marriage of Miss Annie Mae Perdue, of Carrollton, to Mr. Arnold Burton Thompson, of Atlanta, took place Monday evening at a house party given by Miss Floy Harris, in Rome. The wedding was quite a surprise to the ones attending the party as well as the many friends of the bride and groom.

The bride is the daughter of Mr. V. J. Perdue, of Carrollton, and was very popular among the younger set. She wore a going away gown of brown silk with hat to match and her bouquet was of lilacs of the valley and bride roses.

Mr. and Mrs. Thompson will be at home to their friends at 259 North Moreland avenue.

West-Hill

UNION POINT—The marriage of Miss Ruth Virginia Hill to Mr. William Benjamin West, of Woodville, was solemnized Wednesday afternoon, December 16, at the home of the bride's parents, Mr. and Mrs. H. T. Hill, on Hart avenue. Rev. Mr. Lee performed the ceremony in the presence of a number of relatives and friends.

Mr. and Mrs. West are at home to their many friends at Woodville.

Bernhard Joins Lookouts' Staff Of Flingers

Silent Bill Will Act as Coach of Youngsters—Such a Man Needed in Absence of Charlie Street—McCormick Has Nine Hurlers to Start Season

CHATTANOOGA, Jan. 4.—Bill Bernhard, former manager of the Memphis club of the Southern league and one time Athletic and Cleveland star, has been signed to coach the young Lookout pitchers this spring. Bernhard will report at the start of the training season and will stay with the club until the final cutting down time, a month after the season starts. He is well known in Memphis and will be easily accessible at the start of the spring trial.

Manager McCormick has felt ever since the release of Charlie Street that he needed some one who knows the value of pitching to start his young hurlers properly on their season's work. The Lookout effort is frank to admit that he is not a master of the art of pitching, his power being rather in the batting department. In Bernhard he gets a man who has the tricks of the pitching trade as well as a man who is a coach.

It is practically certain that Bill, since will not return next season and since McCormick has a staff composed entirely of youngsters. The staff consists of the following: Harford, Morgan, Currie, Harding, Reynolds, Ross, McCrory, Hill and Lile. Harding is the only one of the club who has had a season in class A ball, and he has had only one.

Such a condition of the twirling corps necessitates the presence of a competent coach of pitchers and this office Bernhard should be able to fill to a quarter's taste. While the hurlers are all young, they are exceptionally promising. They are not so green as last year's collection, which was gathered entirely from the class D circuits and even right from the top.

Charlie Lile, the Jackson (Tenn.) right-hander, who was sent home in August of last year, has been signed for the coming season and has a good chance to make the team. Lile assured the local officials when he left that he would be willing to return this year and has made good on his promise. There are now three members of the Jackson semiprofessional club, Lile, Ross, the promising young left-hander, and Lank, the utility infielder.

The addition to the staff of Harford, Morgan, Currie, Harding and Ross, which finished the season as follows: Reynolds, a southpaw from the Michigan State semiprofessional circuit; Harford, a right-hander from the Salt Lake Union association club; Hill, a southpaw from the Waco, Texas league outfit; and Lile, it will be noted that the club now has two southpaws—Ross, Hill and Reynolds, and it would not be surprising to see two of them retained for the season.

Unusually flattering reports of Hill's ability have been made. McCormick believes that he has picked up a regular in the Texas league. The other two are likely to contend for the opening outpaw berth with the club's other two hurlers, Ross and Reynolds, who were then sent home.

The Chattanooga club is heading north to Currie to finish his course in Davidson college. The management is quite confident that the young right-hander will make a valuable pitcher. While these nine pitchers are being trained as far as class A ball goes, all of them are "full grown" and the last season if they ever will be. Prospects for a good pitching staff are far more certain than in the time last season. The pitchers, as for that matter, will have to be much better this year, as the club will not be as hard-pressed as was the slugging aggregation of 1914.

Burman Hangs Up New Speed Record
DANESFIELD, Cal. Jan. 4.—Bob Burman, in a sanctioned automobile race, broke official time for the 100-mile race, by making a record of 1:22.25.

New York Sports Paid Well to See Boxing
NEW YORK, Jan. 4.—A statement of the last year's work of the State Athletic commission, which controls boxing, shows that the total receipts of the 1914 season were approximately \$165,000, of which the state received a 10 per cent revenue amounting to about \$25,000.

Charles, Canada's greatest soccer player, is now downy, and as he cannot hear what goes on during a game he plays in front of lucky boys.

The Spotlight

BY GRANTLAND RICE

THE ANSWER.
When Matty is finished and through—when his shadow has passed from the hill; When he stalks with the Vanishing Crew And fades where the firing is still. We shall miss him forever—the thrill. The magic and sweep of his play—Yes, yes, I am sure you will. But who weeps for Busie today?

When Wagner has drifted from view—A has-been and out of the drill—A Used-to-be gone from the pew. Of those who labored the Pill— I know you will mourn him until You have come to the dusk of your stay—Aye, yea, I am sure you will. But who weeps for Busie today?

When T. Raymond Cobb throws a shoe—When Walsh comes to Fane's final spill—When all of the masters you knew Pass out from the whirl of the mill—There will never be one who can fill The gap each must leave on his way—Forget them? Who says that you will? But who weeps for Busie today?

When Matty and Wagner are all, The glamour fades out from the fray—The dream shadow looms to the still—But who misses Radbourne today?

What has become of the Old Fashioned Ball Player who used to play for whatever the magnate cared to pay him with the today Canning? We know a number of earnest club owners who would esteem the address.

THE LESSON.
Those who have envied the swift lights and held by ball players and who have nerved at the worth of their fame might look back over 1914 and ponder the case a bit.

Fame in the game comes swift—but no swifter than the hook. At this stage just a year ago the Mackinac Machine was the scourge of the field—the conqueror of champions. Plank and Bender had just humbled the Giants. McGraw had labeled Collins the greatest player of the game. Eight months later this machine had suddenly grown old—and is now scattered. Individually Collins, Plank, Bender and others may be as good as ever. But the glory of the old machine is cracked.

ANOTHER ALLIANCE.
Dear Sir—I think I can tell you, from the inside, just why Harvard dropped Michigan and Cornell. There is a well spread feeling among Harvard men that Cornell is entitled to establish rivalry with the Crimson. Wonderful track teams and crews, together with strong baseball and football squads, have been reduced to ruins for years. In all these sports there are dual competitions with Harvard. And Cornell under Sharpe is coming into her own in football. A Cornell victory next fall would mark an epoch in Crimson athletics as would be victory on Lake Cayuga, for which Harvard is persistently striving. When the time comes where Harvard can take on Yale, Princeton, Cornell and Michigan, all Harvard will welcome it—at least all those who saw the fine spectacle in the Stadium on the last day of last October.

THAT MUCH, ANYWAY.
"How much is a star-baller worth in salary?" asks a sodate editorial in a neighboring exchange.

We put the same query once to one of the wisest managers of the game. The answer was: "As much as he can get." And there you are—or partly, anyway.

Mr. Welsh is now to meet Mr. White. Then Mr. Welsh, still puzzled as to the award of second merit, will meet Mr. Shugrue. This will then bring Mr. White into the picture. Mr. Welsh will be paid \$50,000 three ways and you will be as adjacent to the exact status as any one else.

WITH APOLOGIES.
Said Charley White to Joe Shugrue: "Old sock, I put it over you."

"Aw, think again some other night," Said Joe Shugrue to Charley White.

LATER DAY DETAILS.
The Yanks were sold for over a month in every detail except that regarding the minor league players.

And Princeton has officially decided to go in for a one man head coach—with every detail settled except the name of the party of the first part.

We heard an earnest Nassau alumnus remark a few days ago that "Princeton should go out and get a man like Haughton." In the same way the Yantic could get a pitcher like Walter Johnson or a second baseman like Collins or an outfielder like Cobb.

Herman Due Here Today for Eggers' Match

Transportation Sent Both Boxers Saturday Morning, New York Bantam Should Prove Excellent Opponent for Boy Who Beat Jimmy Pappas

Kid Herman, the New Orleans bantam, who will box Knockout Eggers at the Bijou on the night of the 12th, is expected to arrive in Atlanta today. Mike Saul wired tickets for Herman and his manager, Red Walsh, Saturday morning, with the understanding that the two would leave New Orleans Sunday. Eggers has also been furnished transportation, and he is expected to arrive from New York either today or tomorrow.

While Saul is disappointed in not getting Herman and Frankie Burns together here, it is probable that the bout between Herman and Eggers will prove a better exhibition than would a match between Herman and Burns under conditions that have arisen. Had Burns been brought here after he had attempted to dodge behind the weight proposition, it is not likely that he would have gone into the fray with the snap and ginger that he should have.

On the other hand, it is assured that Eggers will be in there hustling every minute of the mill. In his previous career he has been a somewhat despicable fighter by his clean, aggressive methods. He is a rugged job, and is willing to take a punch from any opponent in order to land one himself. Burns may be able to take a somewhat despicable job, but so far as a real combatant, the only match between the two resulted in a draw after a hard battle.

Herman needs but little commendation. In his only match before a local audience, that with Jimmy Pappas, he was returned a winner by a unanimous decision. He is a clever fighter, and while he made no runaway affair of that match, he showed clearly that he had a margin over the little Greek. The coming fight with Eggers should be a stiff argument for the Crescent City side.

Dahlen Hardest Man to Tag

NEW YORK, Jan. 4.—"In all my years of ball playing," said Johnny Evers recently, the only I found the hardest to touch with the ball as he came down from base were Bill Dahlen, until recently manager of the Brooklyn Nationals.

Dahlen always came straight down the base line, directly at the base, but when he was tagged, he would turn and touch with the ball as he came down from base. He was a hard tagger, and there was no telling what he would do. He had a great way of antcipating where the throw from the catcher was coming and he played his slide to a surety. Coming straight along he suddenly would fall down on his hip, to one side or the other, spread his legs, and then use the greatest cleverness in pulling off of reach and twisting himself to look the base with either foot.

There are other men whom I have found it difficult to tag as second, and among them are Hans Lohr, Charlie Herzog, Campbell, Beecher, Byrne, Magie, Miller, Higgins and Wagner."

Yankees Return Mitchell to Senators
The Yankees have returned Mitchell to the Washington club. A letter from Frank Farrell, the manager of the Yankees, with the information has just reached Manager Griffith.

During the recent National league meeting in New York Griffith made Farrell a present of Mitchell. He did this because he did not want Mike to be sent to the minors, where his salary would have to undergo a deep cut, while he could continue to draw wages as a player from the New York club, where Griffith felt he could make money.

Heinie Wagner May Manage Providence
NEW YORK, Jan. 4.—It was reported yesterday that Charles Wagner, the shortstop of the Boston Red Sox, would succeed "Wild Bill" Donovan as manager of the Providence team next year. Wagner, who has been in the major leagues for the past two years has been playing with a bad arm, and it is said that his playing days are over.

Frank Barrow, who was at the Hotel Waldorf yesterday, said that the new manager of the Providence team would be "Wild Bill" Donovan, who was a player with a bad arm, and it is said that his playing days are over.

General Vile is going to help Jack Curley and Tom Jones stage the Wilk-Johnson fight. Here, where Pancho leans something about the ban.

The ball team will have hit the white horse crop at last. Bumber Smith seems able to whip them all.

The News

ing on the plans put up to him and others for settling the war. According to Ward, Bar Johnson offered to arrange a deal for him to buy the Yankees at a suitable figure, while Charlie Weegman was to be given a check at the Cubans on terms that would suit him.

Both Ward and Weegman turned the proposition down, except on the understanding that the Federal league would continue in existence, with recognition as a major league. In as much as Johnson & Co. had in mind the complete annihilation of the new circuit, they balked on these terms. These facts are at least to the credit of Ward and Weegman, in that they show that the two entertain a certain sense of loyalty to their fellow club owners and associates. Probably Johnson figured that he had a Charlie Murphy, or an Ebbels on the firing.

Now that Ward has made known the facts in this dispute, we can for a long time again yesterday afternoon arrived from New York either today or tomorrow.

And this bunch was exceedingly well paid for its trouble. The western crack did not break any course records, nor did he hang up any low scores for himself. But just as soon as he worked out a few of the kinks in his wrists, he began to shoot 'em in the manner that has made him famous among golfers. Yesterday he and Perry Adair again defeated Malden and Mann. Their victory was marked by a wider margin than it had been in either previous match. They won 4 up with 3 to play.

Incidentally Evans paid young Perry Adair one very high compliment on his form. He remarked that he would take Perry and play any two amateurs in the country on an even basis, and would be willing to wager on the results. Rather a piece of commentary this, on the playing of the local boy, when the source from which it was coming is considered.

Now a little of the inside story on recent dickers between the Federal league and organized baseball on a proposed merger. The Yankees, with Hugh Dugan as the Brooklyn Peds does a bit of chipping.

Good Schedule For Moccasins

Chattanooga Eleven Will Take on Georgia, Sewanee, Transylvania and Others Next Fall

CHATTANOOGA, Tenn., Jan. 4.—With a schedule that includes games here with both Sewanee and Georgia, present indications are that 1915 will be the greatest year in the history of football at the University of Chattanooga. Not only is the schedule of the Moccasins the best ever enjoyed by eleven, representing the local institution on the gridiron, but the prospective material is also the best ever assembled.

The schedule, which has been completed with the exception of one opening on October 2, includes Mercer, Transylvania, Sewanee, Georgia, Kentucky Central and Louisville. In addition the Moccasins will stage an opening contest with the Kiba County High school eleven at Dayton, Tenn.

The Moccasins lose but three varsity men by graduation, the trio being Dehmer, Spencer and Sutherland, the two halves, and an end upon Mike Balenti, 1914 aggregation. The line returns practically intact, with both Harford and Woodworth among the back field men are certain to be back in harness. It makes up for the loss of Steve Dehmer and Sutherland a raft of new material is already assured. The cream of the local "prep" schools—the same institutions that furnished Morrison, Patten, Senter, Johnson and Cushman to Tech, and Tolley, Meltsner and Taylor to Sewanee—are to enter Chattanooga next fall instead of going into foreign fields. Material at Chattanooga in 1915 should be both excellent and plentiful. The lack of second-string material which proved Balenti will not be a problem in 1915.

It is generally believed that Balenti will return to Chattanooga next season, but if he does, it is already assured that additional coaching will be available. The local institution is in the field for a general athletic director now that its new \$100,000 gymnasium is completed and ready for use.

Schultz Will Coach
ANN ARBOR, Mich., Jan. 4.—All reports that "Doc" Schultz, the assistant coach of the Michigan football team, will be retained for the 1915 season, are true. Schultz has signed a contract for 1915. The Michigan football team is still an open question.

BUILDINGS ARE LEASED—BUILDING STARTS THE NEW YEAR WELL—"LEASE NOW" SLOGAN—FOREIGN MEN COME HERE

Quite an important sale of acreage in DeKalb county near Druid Hills, and a few leases were featured in real estate announcements of Monday.

Hudson House also took part in showing so far, and the feeling among agents and investors is a great deal bound to be invested in this country as a result of the war.

more optimistic. The biggest factor in the situation is the advance in the price of cotton. Monday's market was a gain of a bale, with spot cotton ruling close to 8 cents in most southern markets.

This is having its effect on general business, and improvement in real estate is being noted. The market for the steel week showed a decline

east corner of the Decatur and Clifton roads for \$12,250. There were no exclusive rights.

This tract is in land lots 52 and 53 of the eighteenth district of DeKalb county.

LEASE ANNOUNCEMENTS.

Forrest & George Adair have leased for five years the land owned by them in the Elkin-Goldsmith sanitarium property at 29uckle street, which adjoins the rear of the property owned by the Georgia Cattle Company, lots 170 and 170-B, Oglethorpe avenue, for the purpose of erecting a stock house and other buildings.

\$2,000—same to same, No. 154 Oglethorpe avenue, for the purpose of erecting a stock house and other buildings.

This is a four-story building, which the lessees will operate as a hotel.

The new building was owned by Mr. Steele for G. A. Simpson the St. Charles apartments at 6 Williams street, which Mr. Steele will also operate as a rooming house.

BUILDING STARTED

The year 1915 has started out neck-and-neck with 1914 in building, the value so far in January being only \$100,000 less than last year's.

DEED FOR TITLE

\$100,000—E. H. Lundrum to Mrs. Mayne M. Lundrum, wife of E. H. Lundrum, deceased, west of chert road, 50x170 feet, January 1, 1915.

\$100,000—J. W. Smith to J. W. Smith, No. 510 Phillips street, 52x103 feet; January 2, 1915.

W. I. Davis, who has just completed the West End park, makes the remarkable statement to the chamber of commerce building now under construction, that he expects to sell better houses at a reduction of 20 to 40 per cent than he could at the reduction of 10 per cent from 1 to 10 per cent to the fact

That deliveries of material are now made much quicker.

Mr. Davis also mentions a better class of work, better material and more satisfactory service.

LEASE NOW CAMPAIGN.

Commenting on the build now afoot, with the building of new homes, a real estate agent also suggests the "lease now" slogan.

Mr. Logan points out, the merchants have an opportunity to get choice local business.

Even if the lessee made no great improvements, the first year's rent would be \$100,000. If the improvements were made, he would make up for the loss and show a profit during the rest of the term of the lease.

FOREIGN MONEY.

Pittsburgh Knox mentions an instance in which the lessee was not permitted to export foreign money. This is extremely significant as applied broadly to the present situation.

Mr. Knox refers to the fact that
